

Net safety:

Name: We-Blocker

Website: <http://www.weblocker.com/>

Description: Free Software to block inappropriate material

Name: Clam Win

Website: <http://www.clamwin.com/>

Description: *Clam Win* is a *Free Antivirus* for Microsoft Windows 98/Me/2000/XP and 2003. It provides a graphical user interface to the [Clam AntiVirus](#) engine.

Clam Win Free Antivirus comes with an easy installer and [open source](#) code. You may download and use it absolutely free of charge.

Name: X3Watch

Website: <http://www.x3church.com/x3watch/>

Description: X3watch is an accountability software program helping with online integrity. Whenever you browse the Internet and access a site which may contain questionable material, the program will save the site name on your computer in a hidden folder. A person of your choice (an accountability partner) will receive an email containing all possible questionable sites you may have visited within the month. This information is meant to encourage open and honest conversation between friends and help us all be more accountable.

Name: Ad-aware

Website: <http://www.lavasoftusa.com/software/adaware/>

Description: Ad-Aware Personal provides advanced protection from known data-mining, aggressive advertising, Trojans, dialers, malware, browser hijackers, and tracking components

Name: AVG-Link

Website: <http://free.grisoft.com/doc/1>

Description: Free Anti-Virus Program

Name: TUKI

Website: <http://tuki.com/>

Description: Web browser designed for children. Has parental controls and designed for children.

Name: Dan's Guardian

Website: <http://dansguardian.org/>

Description: DansGuardian is an award winning Open Source web content filter which currently runs on Linux, FreeBSD, OpenBSD, NetBSD, Mac OS X, HP-UX, and Solaris. It filters the actual content of pages based on many methods including phrase matching, PICS filtering and URL filtering. It does not purely filter based on a banned list of sites like lesser totally commercial filters.

Name: Accountability Pal

Website: <http://sourceforge.net/projects/accpal/>

Description: Accountability Pal monitors your network and keeps track of who is using the Internet and what they are viewing, downloading, uploading, etc. It emails a report of each user's activity to the person/people you specify. Great for parents and businesses.

Name: Naomi

Website: <http://www.naomifilter.org/>

Description: [Naomi](#) is an advanced internet filtering program, easy to use and totally free, intended for families, and kids in particular.

Church Management Software

Name: Church Info

Website: <http://sourceforge.net/projects/churchinfo/>

Description: ChurchInfo is a free church database network application written in PHP/MySQL. This membership and management database is designed specifically to help automate the operation of a church. It has features to track members, families, groups, donations, etc

Name: Paristemi

Website: <http://www.paristemi.com/>

The forthcoming project titled Paristemi is named after a greek word which means to present. It is the goal of this project to be open source (under the GPL) and be a website for church and non-profit organizations to use for free. The project is still in progress, but if you would like to see what is coming here are some options

Name: Church Website in a Box

Website: <http://sourceforge.net/projects/churchwebsite/>

Description: The 'Church Website in a Box' is a MySQL/PHP content management system designed to be easily deployed and used by any church. All content management and configuration can be done using a web browser. It is an integration of many other projects

Name: Tephillah

Website: <http://sourceforge.net/projects/tephillah>

Description: Tephillah is a system to manage worship team members, songs, songlists, schedules, etc. This system can run as a thick client on a single machine, or as a network-aware thin client that uses intranets and/or the internet to connect members of the team.

Name: CHADDB

Website: <http://sourceforge.net/projects/chaddb>

Description: CHADDB, the CHURCH ADMINISTRATION DATABASE, is a Java/MySQL-based, table-driven church management system that enables churches of any size or structure to manage members through relationships. Web-enabled or run as native application.

Office

Name: Open Office

Website: <http://www.openoffice.org/>

Description: OpenOffice.org is a multiplatform and multilingual office suite and an open-source project. Compatible with all other major office suites, the product is free to download, use, and distribute.

Name: Abi Word

Website: <http://www.abisource.com/>

Description: AbiWord is a free word processing program similar to Microsoft® Word. It is suitable for a wide variety of word processing tasks.

Name: PDF creator

Website: <http://sourceforge.net/projects/pdfcreator/>,
http://sector7g.wurzel6.de/pdfcreator/index_en.htm

Description: PDFCreator easily creates PDFs from any Windows program. Use it like a printer in Word, StarCalc or any other Windows application

Name: TurboCASH Accounting

Website: <http://www.turbocash.co.za/>, <http://sourceforge.net/projects/turbocash>,

Description: TurboCASH Accounting, entry level Delphi, Windows Accounting package for single users, small networks and distributed networks. Accommodates developer scripts, local plugins and multi language translation.

Name: CutePDF

Website: <http://www.cutepdf.com/products/cutepdf/Writer.asp>

Description: Portable Document Format (PDF) is the de facto standard for the secure and reliable distribution and exchange of electronic documents and forms around the world. CutePDF Writer (formerly CutePDF Printer) is the free version of commercial PDF creation software. CutePDF Writer installs itself as a "printer subsystem". This enables virtually any Windows applications (must be able to print) to create professional quality PDF documents - with just a push of a button

Name: Thunderbird

Website: <http://www.mozilla.com/thunderbird/>

Description: Thunderbird delivers. Enjoy safe, fast, and easy email, with intelligent spam filters, quick message search, and customizable views

Name: Primo PDF

Website: <http://www.primopdf.com/>

Description: Convert to PDF from any application by simply 'printing' to the PrimoPDF® printer - it couldn't be easier! Within minutes, you can create high-quality PDFs by converting from Word, Excel, PowerPoint, and virtually any other printable file type..

Name: Organizers Database

Website: <http://organizersdb.org/home>

Description: A database program designed for Non-profits.

Name: eBase

Website: <http://www.ebase.org/>

Description: ebase is a complete nonprofit database solution. With it's comprehensive feature set, ebase can help you manage donors, prospects, volunteers, activists, email lists and more – all in one place-

Name: Open Workbench

Website: <http://www.openworkbench.org/>

Description: Open Workbench is an open source Windows-based desktop application that provides robust project scheduling and management functionality and is free to distribute throughout the enterprise. When users need to move beyond desktop scheduling to a workgroup, division or enterprise-wide solution, they can upgrade to CA's Clarity™ system, a project and portfolio management system that offers bidirectional integration with Open Workbench.

Name: Free Mind

Website: http://freemind.sourceforge.net/wiki/index.php/Main_Page

Description: FreeMind is a premier free mindmapping software written in Java. The recent development has hopefully turned it into high productivity tool. We are proud that the operation and navigation of FreeMind is faster than that of MindManager because of one-click "fold / unfold" and "follow link" operations.

Computer Utilities:

Name: Video LAN Client

Website: <http://www.videolan.org/>

Description: VLC is a free cross-platform media player.

Name: Full Sync

Website: <http://fullsync.sourceforge.net/>

Description: FullSync is a universal file synchronization and backup tool which is highly customizable and expandable. It is especially for developers, but the basic functionality is easy enough for everyone.

Name: Cryptainer LE

Website: <http://www.cypherix.com/cryptainerle/>

Description: Secure your data and ensure absolute privacy with Cypherix's powerful encryption software, Cryptainer LE. It's powerful 128 bit encryption, creates multiple 25 MB encrypted containers (vaults) on your hard disk. These encrypted vaults can be loaded and unloaded when needed. You can view, modify and hide all types of files with a single password

Name: CDBurnerXP Pro

Website: <http://www.cdburnerxp.se/>

Description: With this software you can burn CD-R, CD-RW DVD+R/RW DVD-R/RW discs.

Name: 7-Zip

Website: <http://www.7-zip.org/>, <http://sourceforge.net/projects/sevenzip/>

Description: 7-Zip is a file archiver with the high compression ratio. The program supports 7z, ZIP, CAB, RAR, ARJ, LZH, CHM, GZIP, BZIP2, Z, TAR, CPIO, RPM and DEB formats. Compression ratio in the new 7z format is 30-50% better than ratio in ZIP format

Name: Smoothwall

Website: <http://smoothwall.org/>

Description: SmoothWall is a best-of-breed Internet firewall/router, designed to run on commodity hardware, and to give an easy-to-use administration interface to those using it.

Name: Clonezilla

Website: <http://clonezilla.sourceforge.net/>

Description: To clone a system, you might be familiar with the commercial package [Norton Ghost®](#), or the opensource solution [Partition Image](#). However, it takes time to massively clone system to many computers. You may be familiar with the commercial package [Symantec Ghost Corporate Edition®](#) with multicasting. Now, Clonezilla is the opensource clone system (OCS) with unicasting and multicasting. With [DRBL](#) and network boot enabled client computers, the only thing you have to prepare is a Clonezilla server, and you do not have to prepare a bootable CD or floppy with Partition Image for every client computer.

Name: Damn Small Linux

Website: <http://www.damnsmalllinux.org/>

Description:

Damn Small Linux is small enough and smart enough to do the following things:

- Boot from a business card CD as a live linux distribution (LiveCD)
- Boot from a USB pen drive
- Boot from within a host operating system (that's right, it can run *inside* Windows)

- Run very nicely from an IDE Compact Flash drive via a method we call "frugal install"
- Transform into a Debian OS with a traditional hard drive install
- Run light enough to power a 486DX with 16MB of Ram
- Run fully in RAM with as little as 128MB (you will be amazed at how fast your computer can be!)
- Modularly grow -- DSL is highly extendable without the need to customize

DSL was originally developed as an experiment to see how many usable desktop applications can fit inside a 50MB live CD. It was at first just a personal tool/toy. But over time Damn Small Linux grew into a community project with hundreds of development hours put into refinements including a fully automated remote and local application installation system and a very versatile backup and restore system which may be used with any writable media including a hard drive, a floppy drive, or a USB device.

Name: Rootkit Revealer

Website: <http://www.sysinternals.com/Utilities/RootkitRevealer.html>

Description: RootkitRevealer is an advanced rootkit detection utility. It runs on Windows NT 4 and higher and its output lists Registry and file system API discrepancies that may indicate the presence of a user-mode or kernel-mode rootkit. RootkitRevealer successfully detects all persistent rootkits published at www.rootkit.com, including AFX, Vanquish and HackerDefender (note: RootkitRevealer is not intended to detect rootkits like Fu that don't attempt to hide their files or registry keys). If you use it to identify the presence of a rootkit please let us know!

Name: Knoppix-Link

Website: <http://www.knoppix.org/>

Description: KNOPPIX is a bootable CD or DVD with a collection of [GNU/Linux](#) software, automatic hardware detection, and support for many graphics cards, sound cards, SCSI and USB devices and other peripherals. KNOPPIX can be used as a productive Linux desktop, educational CD, rescue system, or adapted and used as a platform for commercial software product demos. It is not necessary to install anything on a hard disk. Due to on-the-fly decompression, the CD can have up to 2 GB of executable software installed on it. (over 8 GB on the DVD "Maxi" edition). This has tools to fix computers Linux and other computers as well.

Graphics:

Name: The Gimp

Website: <http://www.gimp.org/>

Description: GIMP is the GNU Image Manipulation Program. It is a freely distributed piece of software for such tasks as photo retouching, image composition and image authoring. It works on many operating systems, in many languages.

Name: Blender

Website: <http://www.blender.org/>

Description: Blender is the open source software for 3D modeling, animation, rendering, post-production, interactive creation and playback.

Name: Povray 3.5

Website: <http://www.povray.org/>

Description: The Persistence of Vision Raytracer is a high-quality, totally free tool for creating stunning three-dimensional graphics. It is available in official versions for Windows, Mac OS/Mac OS X and i86 Linux.

Internet

Name: FireFox

Website: <http://www.mozilla.com/firefox/>

Description: The award-winning open source Web browser. Browse the Web with confidence - Firefox protects you from viruses, spyware and pop-ups. Enjoy improvements to performance, ease of use and privacy.

Name: Beonex

Website: www.beonex.com

Description: Beonex (0.8.2) is a full-featured web-browser and email/news client targeted at end-users—both individuals at home and companies of all sizes. It is based on Mozilla source code, which in turn is based on the Netscape Communicator code

Name: Mozilla Suite

Website: <http://www.mozilla.org/products/mozilla1.x/>

Description: Web-browser, advanced e-mail and newsgroup client, IRC chat client, and HTML editing made simple -- all your Internet needs in one application.

Name: GAIM

Website: <http://gaim.sourceforge.net/>

Description: A multi-protocol instant messaging (IM) client

Name: GNU Privacy Guard

Website: <http://www.gnupg.org/>

Description: An encryption program.

Name: Filezilla

Website: <http://sourceforge.net/projects/filezilla/>

Description: FileZilla is a fast FTP and SFTP client for Windows with a lot of features.

Multimedia

Name: Audacity

Website: <http://audacity.sourceforge.net/>

Description: Audacity is free, open source software for recording and editing sounds. It is available for Mac OS X, Microsoft Windows, GNU/Linux, and other operating systems

Name: Video LAN Client

Website: <http://www.videolan.org/>

Description: VLC is a free cross-platform media player.

Name: The Beamer Project

Website: http://sourceforge.net/project/showfiles.php?group_id=29281

Description: a software to display song texts in (youth) services using a video beamer - free, comfortable and without MS Powerpoint. It requires some learning time but provides unique features.

Name: Hydrogen

Website: <http://www.hydrogen-music.org/>

Description: Hydrogen is an advanced drum machine for GNU/Linux. It's main goal is to bring professional yet simple and intuitive pattern-based drum programming.

Name: CD-DA X-Tractor

Website: <http://xtractor.sourceforge.net/>

Description: CD-DA X-Tractor, a CD ripper for 32-bit Windows platforms. It features intelligent jitter correction, internet CDDB support, on-the-fly MP3 encoding via BladeEnc or Lame_enc.

Name: Csound

Website: <http://sourceforge.net/projects/csound/>

Description: Csound is a sound and music synthesis system, providing facilities for composition and performance over a wide range of platforms. It is not restricted to any style of music, having been used for many years in at least classical, pop, techno, ambient..

Educational

Name: Moodle

Website: <http://moodle.org/>

Description: Moodle is a course management system (CMS) - a free, [Open Source](#) software package designed using sound [pedagogical principles](#), to help educators create effective online learning communities. You can download and use it on any computer you have handy (including webhosts), yet it can scale from a single-teacher site to a 50,000-student University.

Name: Stamina

Website: <http://typingsoft.com/download.htm>

Description: Amusing, yet multifunctional touch-typing tutor with support for several layouts: QWERTY (US, UK, ...), Dvorak, AZERTY etc. The program is perfect for novice as well as advanced users.

Name: Tux Typing

Website: <http://tuxtype.sourceforge.net/>

Description: Tux Typing is an educational typing tutor for children. It features several different types of game play, at a variety of difficulty levels.

Name: Tux Paint

Website: <http://www.newbreedsoftware.com/tuxpaint/>

Description: A drawing program for young children with sound effects, a cartoon character, and fun 'rubber stamp'/'sticker book' pictures

Name: Childsplay

Website: <http://childsplay.sourceforge.net/>

Description: Childsplay is a 'suite' of educational games for young children. It's written in Python and uses the SDL-libraries to make it more games-like then, for instance, gcompris. The aim is to be educational and at the same time be fun to play

Name: Celestia

Website: <http://celestia.sourceforge.net/>

Description: Celestia is real-time 3D space simulation which lets you travel through our solar system and to over 100,000 stars in our neighborhood.

Name: Flashcards 3.0

Website: <http://rawilson.net/shareware/index.html>

Description: I put this together for my kids to practice their basic math facts. It's a simple flashcard program that covers addition, subtraction, multiplication and division. You can select any one of the operations to practice on, or have the program mix them up. Though the default is 10, facts up to 100 are selectable. Version 3.0 includes the ability to practice fractions. A timer or a clock runs in the background, and a count of correct/incorrect answers is displayed. This program is freeware. Enjoy.

Name: Read Please

Website: <http://www.readplease.com/>

Description: Reads any onscreen text in any of four voices

Name: Certification Genie

Website: <http://in.tech.yahoo.com/010721/94/11n8x.html>

Description: These are free, fully functional MCSE Track practice exams with over 500 questions, including scenarios, exhibits, and detailed explanations. This is the only program you need to fully prepare yourself for the MCSE NT 4.0 exams. It includes Networking Essentials, NT Workstation, Server, Enterprise, TCP/IP, and IIS 4.0.

Note: You must register at the website to get the serial number to unlock this exam.

Name: Exam II

Website: <http://www.deltafarms.com/setup.exe>

Description: A program for designing and administering exams. It can also be used by a student for preparing for practice exams.

Christian:

Name: VpSX

Website: <http://sourceforge.net/projects/vpsx>

Description: VpsX is an all in one Video Projection suite designed initially to replace the old overhead projector. VpsX runs on Windows. The software uses windows' Dual monitor system to display lyrics on one screen, while controlling the program on the other

Name: InVerse

Website: <http://www.bibleinverse.org/features.php>

Description: Memorizing Scripture verses is a laudable ambition, but a beginner can find it overwhelming. *InVerse* simplifies this, containing over 15,300+ verses preloaded in 2,800 of the best known Bible passages from 11 Bible translations

Name: CCEL Desktop

Website: www.openlp.org ,<http://sourceforge.net/projects/openlp/>

Description: The CCEL Desktop is a desktop digital library. It supports installation, maintenance, access, and searching of books from the Christian Classics Ethereal Library (<http://www.ccel.org>) on your PC.

Name: Open LP

Website: www.openlp.org ,<http://sourceforge.net/projects/openlp/>

Description: openlp.org allows churches to easily project song words and other data onto a screen in a church

Name: Higher Power Point

Website: <http://sourceforge.net/projects/higherppt/>

Description: Worship projection software focused on ease of use, with thumbnail-driven slide navigation, easy show preview/switching, creating on-the-fly slides / shows from lyrics, scripture, PowerPoint, etc, & integrated web library to aid worship leaders' planning.

Name: BibleData Base Software

Website: http://www.bibledatabase.com/free_bible_software.htm

Description: Free Bible Software

Name: The online bible

Website: <http://www.onlinebible.net/describe.html>

Description: The Online Bible has been developed as a tool to aid in studying the Bible. Whether you are a pastor, Sunday School teacher or just looking for a program to "dig into" the scriptures, you will find everything you need in this software.

Name: BiblePro

Website: <http://bibleocean.com>

Description: This new version of BiblePro is our most popular tool, nearly 300,000 downloads at download.com and 250,000 from all other download sites. BiblePro is designed for those students of the Bible who need the most powerful tools and references.

Name: e-Sword

Website: <http://www.e-sword.net/downloads.html>

Description: e-Sword is a fast and effective way to study the Bible. e-Sword is feature rich and user friendly with more capabilities than you would expect in a free software package. The fact that e-Sword is free is just one of the blessings and does not speak of the quality of the software. I make my living writing software and I believe I have put forth my best effort in this endeavor. The real work, however, was put in by the godly men and women who devoted countless years creating the texts that have been made available for our benefit.

Name: CCL Desktop

Website: <http://sourceforge.net/projects/ccel-desktop/> ,

Description: The CCEL Desktop is a desktop digital library. It supports installation, maintenance, access, and searching of books from the Christian Classics Ethereal Library (<http://www.ccel.org>) on your PC.

Name: The Sword

Website: <http://www.crosswire.org/sword/index.jsp>,

<http://sourceforge.net/projects/sword/>

Description: The SWORD Project is the [CrossWire Bible Society](http://www.crosswire.org)'s free Bible software project. Its purpose is to create cross-platform open-source tools-- covered by the [GNU General Public License](http://www.gnu.org/licenses/gpl.html)-- that allow programmers and Bible societies to write new Bible software more quickly and easily. We also create Bible study software for all readers, students, scholars, and translators of the Bible, and have a growing collection of over 200 texts in over 50 languages.

Name: Open Source Church

Website: <http://sourceforge.net/projects/osc/>, <http://www.churchledger.com/>,

Description: OSC (Open Source Church) is a Church Management Software (CMS). It supports Membership, Giving, End of Year Tax Statements and group management. OSC is a fork of the Infocentral project.

Name: Open Song

Website: <http://www.opensong.org/>, <http://sourceforge.net/projects/opensong/>

Description: OpenSong is a free software application for managing chords and lyrics sheets (lead sheets), presenting lyrics (and custom slides) using a projector, and much more! Great for worship leaders and musicians!

Palm Software

Name: Olive Tree Bible Reader

Website: <http://www.olivetree.com>

Description: Olive Tree Bible Software provides Bible versions and study tools for Palm OS, Pocket PC, Smartphone and Symbian cell phones, and BlackBerry devices and coming cell phone support for most cell phones sold today.

Name: Online Bible

Website: <http://www.onlinebible.org/>

Description: The name *Online Bible* was chosen in 1987, long before there was a world wide web. Once you have downloaded the free Starters Pack or extra titles from the download library and installed it to your hard drive it will run without any connection to the internet.

Name: Qtopia Sword Reader

Website: <http://www.crosswire.org/qpsword/>

Description: The Qtopia Sword Reader (qpsword) is a micro UI for the The SWORD Project textual retrieval and research engine. Plugin books include Bibles, commentaries, lexicons, dictionaries, daily devotionals, and more, and works nicely as a general book reader

Name: Bible+

Website: <http://palmbibleplus.sourceforge.net/>

Description: Bible+ is a free (GPL -licensed) Bible reader for Palm OS derived from the original [BibleReader](#) that was created by Poetry Poon.

Name: SWORD Reader For The PocketPC

Website: <http://www.crosswire.org/sword/swordreader/>

Description: A basic SWORD reader for use on PocketPC handhelds like the HP iPAQ.

Name: SMS Advance

Website: <http://www.whatwouldjesusdownload.com/products.html>

Description: The Scripture Memory System is the Ultimate FREE Scripture memory program for your PDA. It is based on the popular [Topical Memory System](#) by [The Navigators](#). The verses are provided in the KJV. You can also edit/add you own verses. SMS Advanced also has many other study tools including Prayers, Sermons, Journal, and Daily Reader.

Others

Name: Martus

Website: <http://www.martus.org/>

Description: Martus is a software tool that allows users to document incidents of abuse by creating bulletins, uploading them at the earliest opportunity, and storing them on redundant servers located around the world.

Name: Homeless Management Information System Home Page

Website: <http://hmis.sourceforge.net/>

Description: The Homeless Management Information System (HMIS) allows organizations providing services to the homeless to collect client information electronically. The HMIS uses a web-based interface generated by PHP, and backed by either PostgreSQL or Microsoft SQL Server.

The HMIS is designed to be flexible, secure and protect client confidentiality. The HMIS allows organizations providing services to the homeless to:

- Collects individual client information (gender, age, ethnicity, etc.)
- Collects household information (housing status, services provided, income, etc.)
- Lets providers dynamically query individual/household data.
- Allows providers to selectively share client data with other service providers.
- Produce reports required by funding agencies.

The goals of the HMIS goals are to improve the delivery of services to the homeless by: Allowing providers to efficiently organize their client files in a secure, flexible electronic system that protects client confidentiality. Allowing providers to generate reports based on aggregate queries of client data to demonstrate the level of need and gaps in services.

Name: Civic CRM

Website: <http://www.openngo.org/>

Description: CiviCRM is the first open source and freely downloadable constituent relationship management solution. CiviCRM is web-based, internationalized, and designed specifically to meet the needs of advocacy, non-profit and non-governmental groups.

Name: Sahana

Website: <http://www.sahana.lk/>

Description: **Sahana** means "*Relief*" in Sinhalese. As the name itself implies, **Sahana** is a free and open source Disaster Management System. It mainly facilitates management of Missing people, disaster victims, Managing and administrating various organizations, managing camps and managing requests and assistance in the proper distribution of resources.

Name: XAMPP

Website: <http://www.apachefriends.org/en/xampp.html>

Description: Many people know from their own experience that it's not easy to install an Apache web server and it gets harder if you want to add MySQL, PHP and Perl. XAMPP is an easy to install Apache distribution containing MySQL, PHP and Perl. XAMPP is really very easy to install and to use - just download, extract and start.

Name: DBDesigner 4

Website: <http://www.fabforce.net/dbdesigner4/>

Description: BDesigner 4 is a visual database design system that integrates database design, modeling, creation and maintenance into a single, seamless environment. It combines professional features and a clear and simple user interface to offer the most efficient way to handle your databases.

DBDesigner 4 compares to products like [Oracle's Designer](#)©, [IBM's Rational Rose](#)©, [Computer Associates's ERwin](#)© and [theKompany's DataArchitect](#)© but is an Open Source Project available for Microsoft Windows© 2k/XP and Linux KDE/Gnome. It is release on the GPL.

Name: Wink 2.0

Website: <http://www.debugmode.com/wink/>

Description: Wink is a Tutorial and Presentation creation software, primarily aimed at creating tutorials on how to use software (like a tutor for MS-Word/Excel etc). Using Wink you can capture screenshots, add explanations boxes, buttons, titles etc and generate a highly effective tutorial for your users.

Open Source Christain Software

Name: Eprayer

Website: <http://sourceforge.net/projects/eprayer>

Description: Eprayer is a prayer request script to allow visitors to submit prayer requests to be mailed out to your designated prayer team members. It is easy to install and customize. It requires a MySQL database but also creates a flat file for exporting.

Name: Berean Bible sw to nobly study Scripture

Website: <http://sourceforge.net/projects/berbible>

Description: Easy to use Bible s/w for children/missionaries/non-techie's who have obsolete Lowest Common Denominator computers (486, slow 1 gb drive, 640*480 res, 32 mb mem, broken CD, 28.8 modem, Win95). BerBibleSetup.exe fits on 1.44 floppy with WEB OT+NT.

Name: BibleMemorizer

Website: <http://sourceforge.net/projects/berbible>

Description: BibleMemorizer is a program to help with memorizing scripture

Name: Konnections

Website: <http://sourceforge.net/projects/konnections/>

Description: Konnections is an open source Donorbase / Donor Management System. The program tracks donors, gifts, and pledges; it does reporting, mail and email merges, and exports. Our goal is to add useful features for non-profit organizations. Donor base.

Name: InVerse Scripture memorization

Website: <http://sourceforge.net/projects/inverse>

Description: God is pleased when followers of the Lord Jesus Christ grow in their knowledge of His Word and the saving message of His Son. Memorizing Scripture verses

is laudable, but beginners can find it daunting. InVerse simplifies this with 15,300 preloaded verses

Name: Accountability Pal

Website: <http://sourceforge.net/projects/accpal>

Description: Accountability Pal monitors your network and keeps track of who is using the Internet and what they are viewing, downloading, uploading, etc. It emails a report of each user's activity to the person/people you specify. Great for parents and businesses

Name: Asaph

Website: <http://sourceforge.net/projects/asaph>

Description: Asaph is a tool for Christian music groups and worship leaders for managing song databases. Features include printing lead sheets and song books with or without chord markings, and generating presentations for use in group worship.

Name: PHPSermon

Website: <http://sourceforge.net/projects/phpsermon>

Description: An Audio Sermon Content Management System based on PHP & MySQL. It provides a simple way to include speaker, series, reference, date, title and links to various digital audio and PowerPoint files. It is designed to be small & easy to manage.

Name: Online Songbook

Website: <http://sourceforge.net/projects/onlinesongbook>

Description: The Online Songbook is a web interface to a database of songs. Allows users to collaboratively edit songs in ChordPro format, create and share collections of songs, and print collections in a variety of formats

Name: Cross Notes

Website: <http://sourceforge.net/projects/biblenotes>

Description: Store and organize notes (or reader impressions) of the Holy Scriptures. Support for cross-referenced notes (i.e., notes that can reference many passages) and searching by note content or passages referenced. A 3d visualization of the note database too

Name: Clearstory Church Portal System

Website: <http://sourceforge.net/projects/clearstory>

Description: A web portal system created specifically for churches, with features ranging from content and contact management to prayer request and announcement tracking. Designed with an easy-to-navigate XHTML+CSS frontend and object-oriented code.

Name: Chordshop

Website: <http://sourceforge.net/projects/chordshop>

Description: Chordshop produces high quality PDF songsheets and songbooks. Using an extended ChordPro format, it has advanced features like the support of measures, on-the-

fly transposition, and dual chord lines to show capoed chords along with the actual chords
